

International Partners

The E+I Department maintains a wide range of partnerships with international universities. Many of these agreements, especially those part of the European Union's ERASMUS program, are established on the departmental level, i.e. they only benefit students of the respective departments. As a Bachelor's or Master's degree student, you should contact the **International Office** well ahead of time to find out which exchange opportunities apply to you, and also to inform yourself about the language requirements of the respective partner universities.

Partner Institutions of the Department of Electrical Engineering and Information Technology
